

PERSONAL GEAR BAG

IMPROVED!

Designed to hold your harness, helmet, goggles, AZTEK System, hardware, and more. Our Personal Gear Bag has a full-length external side pocket for gloves, wallet, phone, energy bars and other small items, along with two interior zippered pockets for keys and other small items, including a soft fleece-lined pocket for storing eyewear. Main compartment features wrap-around zippered panel to allow quick access and easy loading/unloading of essentials. While donning your personal gear, pull out the hide-away shoulder straps to convert the bag into a backpack for carrying essential rescue equipment. Two-piece comfort grip handles on top provide easy carrying, and a heavy-duty Top GunTM fabric bottom will provide years of dependability. Two external MOLLE strips can be used for carrying carabiners or for lashing. Its 37-litre size is perfect for traveling light and performs well as a workout bag too!

Working-At-Height / Industrial Rope Access / Technical Rope Rescue

Working at height requires reliable, quality equipment. The Personal Gear Bag can be used with confidence in work-at-height maneuvers for industrial rope access or technical rope rescue when used in accordance with the regulatory safety standards it falls under. Always use life safety equipment and gear according to the regulatory safety standards for which it is classified and/or certified.
