

ANCHOR STRAP

Anchor straps have a tough job, and see a lot of wear and tear. Over the years, we've learned that cuts and abrasion are the greatest threats to their safety and service life. To dramatically increase durability, our Anchor Straps feature two layers of mil-spec, resin-coated nylon web. Sewn by our highly skilled workers who make our rescue harnesses, Anchor Straps feature forged steel D-rings individually proof loaded and sized for easy choker (girth-hitch) configuration when desired. A sewn-on web keeper allows for improved organization when stowed. Use our sized [Anchor Strap Sleeves](#) for added edge and abrasion protection.

Note: We recommend using a [Delta Quick Link](#) connector (part #382121) to prevent possible tri-axial loading of a carabiner when used in a basket configuration.
