

PROTECH™ ALUMINUM KEY-LOCK CARABINERS

Ideal for rescue and rope access, this anodized carabiner's patented key-lock design does not hang up when unclipping from your harness or web. An optimized D-shape maximizes its strength, and its wide gate opening fits over 1-inch (25-mm) diameter railings, unusual for a carabiner this compact and light. Safety indicators etched on the gate augment easy one-hand operation. Auto-Lock versions are available with a removable keeper pin for use with lanyards or for terminating escape or RIT lines. Every carabiner is proof loaded. Serial numbers on every carabiner.
