

CONFINED SPACE HARNESSTM

The all-around choice for confined space operations, heavy rescue and USAR incidents, our ANSI-rated Confined Space HarnessTM is exceptionally comfortable, even when used for a shoulder lift. The molded waist padding with lumbar support and breathable D3 cloth provide industry-leading comfort. The redesigned buckle system and our unique Web KeepersTM provide ease of adjustment while keeping the web tails in place. Multiple attachment points include fall arrest points and shoulder lift points with a front waist D-ring for comfortable rappels. The mesh vest provides excellent breathability and keeps the shoulder straps organized to make donning easy. A handgrip has been added to the back for assisting the rescuer out of tight spaces. The harness has a radio pocket, a multi-use pocket and a zippered mesh accessory pocket, which is ideal for a small gas monitor. Attachment points: dorsal, front and rear waist, sternal, shoulders.

- Two ANSI Z359.11 certified lanyard attachment loops at waist
- UL Classified to NFPA Standards – Class III Life Safety Harness
- UL Classified to ANSI Z359.11
- Made in USA (of domestic and foreign components)

Option	Small
Item	202162
